

Critical Records Access (CRA) Edition

CRA allows SAP Customers to Verify
Critical Records are Accessible

Effortless SAP Data Verification with InForwarder CRA

The InForwarder CRA Edition helps organizations maintain and verify the integrity of their SAP data by automation (ex: LLMs) or interactively as it is **securely “Pushed”** to verification platforms such as SAP Data Sphere.

How it Works

With the **forwarding** capability provided, SAP customers can verify the integrity of their business data (Orders, Sales, Manufacturing rates) in near real-time.

With the ability to direct data flows to centralized verification platforms, **InForwarder CRA** helps confirm the accuracy and compliance of your SAP and SAP S/4HANA systems without disruption to ongoing operations to maintain data integrity while reducing risk.

Key Features:

- ✓ Forwarding of NetWeaver Gateway Service hosted business data with embedded relational model
- ✓ Reuse CDS views or BW Extractors
- ✓ Access data with application layer semantic model
- ✓ Auto-generation of load and unload scripts for popular data warehouses e.g. SAP Data Sphere, Snowflake, Synapse, Fabric on Azure, AWS and Google Cloud
- ✓ Automated, extensible at application level
- ✓ Compatible with SAP NetWeaver (7.4 SP1 or higher)

Critical Records Access (CRA) Edition is available in the following sizes:

Trial | Small | Medium | Large | Custom

SMALL

Small is single SAP SID* with 5 or less NetWeaver instances

Priced per SAP SID per year

MEDIUM

Medium is a single SAP SID* with 6 to 11 NetWeaver instances

Priced per SAP SID per year

LARGE

Large is a single SAP SID* with 12 to 20 NetWeaver instances

Priced per SAP SID per year

*SID : System Identifier (e.g. S4H)

InForwader CRA Edition leverages the SAP NetWeaver gateway for maximum flexibility while integrating with SAP systems.
